Zebra Blind

VERSATILE LIGHT CONTROL

Dual-layer window covering that alternates between opaque and translucent stripes, allowing for adjustable light control and privacy.

Gentle

SERIES ONE

These stripes give zebra shades their name and a special ability to filter light similar to window blinds or interior shutters.

A harmonious and upscale palette that blends warmth, romance, and sophistication.

Ivory Fold Curtain Track

SERIES EIGHT

This design allows curtains to hang gracefully and provides smooth movement, making it ideal for covering bay windows or curved areas, while adding a stylish and contemporary touch to your window treatments.

Ivory Fold Curtain Track

Ivory fold curtains, also known as S-Fold are named for their unique shape. If you look down at these draped curtains, you will be able to see the soft “S” shape created by its specially designed tracks. The fabric is not actually pleated—it is instead held in place by a stiffened heading tape attached to the track.
